REED MACHINISTS' VISES.

These self-adjusting jaw vises are lower in design than others, so that they can be placed on same height benches with standard swivel and stationary vises. Workmen do not have to stand on platforms to work at our self-adjusting jaw vises. **Absolutely Guaranteed Against Breakage.**

The back jaws of these vises are self-adjusting, and when in use conform automatically to any angle and make firm the objects held. The self-adjusting jaw feature is of such a design that it is absolutely as strong and durable as a solid jaw.

Stationary Base, Self-Adjustable Jaw.
